

Qualifications on the GOC Register

Purpose:

Council is asked to note the updated list of qualifications for publication on the GOC Register.

Summary:

The College of Optometrists has reviewed its list of qualifications approved for GOC registration and supplied the GOC with an updated list – **Annex 1**. In conjunction with the Association of British Dispensing Opticians and other optical bodies it has compiled a complete list of qualifications for both professions.

Section 12(10) of the Act states:

The Council must from time to time publish, in such form (including electronic form) as they consider appropriate, a list of establishments and qualifications approved by them, indicating the purposes for which the approval was granted.

Registration Committee has considered the list of qualifications and has asked for referral to Council for noting. The attached list will now be used as the definitive reference list (as approved by Council under Section 12(10) of the Act) when making entries on the GOC Register, and the list will replace the present list which appears within the Registration section of the GOC website.
